Areas of Capability

1. Fitness to practise – the doctor's awareness of when his/her own performance, conduct or health, or that of others, might put patients at risk, and taking action to protect patients
2. Maintaining an ethical approach – practising ethically, with integrity and a respect for diversity
3. Communication and consultation skills – communication with patients, and the use of recognised consultation techniques
4. Data gathering and interpretation – for clinical judgement, choice of physical examination and investigations and their interpretation
5. Clinical examination and procedural skills – competent physical examination of the patient with accurate interpretation of physical signs and the safe practice of procedural skills
6. Making a diagnosis / decisions – a conscious, structured approach to decision making
7. Clinical management – recognition and management of common medical conditions in primary care
8. Managing medical complexity – aspects of care beyond managing straightforward problems, including management of co-morbidity, uncertainty, risk and focusing on health rather than just illness
9. Working with colleagues and in teams – working effectively with other professionals to ensure good patient care, including sharing information with colleagues
10. Maintaining performance, learning and teaching – maintaining performance and effective CPD for oneself and others
11. Organisation, management and leadership - an understanding of the use of computer systems to augment the GP consultation and primary care at individual and systems levels, the management of change, and the development of organisational and clinical leadership skills
12. Practising holistically, promoting health and safeguarding – operating in physical, psychological, socioeconomic and cultural dimensions, taking into account feelings as well as thoughts
13. Community orientation – management of the health and social care of the practice population and local community
